

**YOUR INFORMATION
IS BEING PLUCKED
ONE BIT AT A TIME**
when your computer hard drive
is not properly destroyed!

HARD DRIVE AND MEDIA DESTRUCTION

ShredTex's state-of-the-art shredding machines. Designed to shred the drives so that no data can ever be reconstructed or retrieved.

THE SHREDTEX HARD-DRIVE DESTRUCTION PROCESS.

- ① No degaussing.
- ② No hole drilling.
- ③ Serial number of each drive recorded prior to destruction.
- ④ Certificate of destruction provided for each project.
- ⑤ High-capacity equipment allows several hundred units to be destroyed at a time.
- ⑥ Services offered to businesses or individuals: call for a pickup, ship your items, or drop them off at our facility.
- ⑦ Entire process is AAA certified by NAID and regarded as the most secure process available for hard-drive destruction.
- ⑧ Provide Asset Tracking Services by recording the serial number of each hard drive prior to destroying the units. A copy of the serial-number list is provided to the client with the Certificate of Destruction.
- ⑨ We recycle 100% of all hard drives, microfilm, microfiche, X-rays and MRIs destroyed.
- ⑩ Ensure compliance with Fair and Accurate Credit Transactions Act (FACTA) disposal rules, HIPAA, SEC Gramm-Leach-Bliley, FDA safety regulations, the Bank Secrecy Act, the PCI Data Destruction Act, and federal, local, and state laws and regulations by having a documented end-of-life procedure in place.
- ⑪ We handle everything – collection, transport, destruction, disposal, chain of custody, and certification of destruction.
